■ What the agent does

€79/mo · support, email, tickets

■ Benefits

- 24/7 customer auto-replies
- Saves 12+ hrs/week of support work
- 6 languages, one-click install

■ How it works (4 steps)

1. Scan your site

Paste your URL into the compat scanner. We detect your CMS and recommend the install method.

2. Generate API key

Create a pk_live_... key in your dashboard, locked to your domain.

3. Install snippet or plugin

1-line JS in , or upload our WP plugin .zip. Done in 3 minutes.

4. Agent goes live

Real-time stats in your dashboard. Hands-off.

■ Your install snippet

Replace `pk_live_...` with your API key from the dashboard (toprankpulse.com/dashboard?tab=api-keys)

```
<script async
src="https://toprankpulse.com/api/static/embed/agent.js"
data-agent="helpdesk"
data-key="pk_live_REPLACE_ME"
data-locale="en"></script>
```

■ 3 install methods

A) JavaScript snippet (easiest)

Paste the snippet above into your . Works on any HTML, including Shopify, Webflow, Wix Premium.

B) WordPress plugin (.zip)

1. Download .zip from toprankpulse.com/api/plugin/wordpress/toprankpulse-agents.zip
2. WP Admin → Plugins → Add New → Upload Plugin
3. Pick .zip, click Install Now, then Activate
4. Settings → TopRankPulse Agents → paste API key
5. Use the shortcode: `[trp_agent slug="helpdesk"]`

C) REST API (developers)

```
curl -X POST "https://toprankpulse.com/api/public/agent/helpdesk/run" \
-H "Authorization: Bearer pk_live_..." \
-H "Content-Type: application/json" \
-d '{"message":"Test","locale":"en"}'
```

■ Troubleshooting

Problem	Solution
Bubble doesn't show	Check browser console. Often CSP header blocking 3rd-party scripts.
401 invalid_api_key	Check snippet data-key. Verify key isn't revoked.
403 domain_not_allowed	Add your domain to 'Allowed domains' in dashboard.
429 monthly_quota_exceeded	Upgrade plan (free=100, pro=5000, business=25000 runs/mo).
